PRE-CARE

Please remove all jewelry before appointment; treatment area should be free of make-up/lotions. Shave the treatment area if there is excessive hair. Do not use self-tanning lotion for a week before the treatment. Stay well hydrated before and following your treatment.

CONTRAINDICATIONS

- any implanted devices in the treatment area (including metallic implants, electronic implants, timed-release medical implants, and superficial body contouring implants)
- cardiac pacemakers or internal defibrillators
- open wounds or lesions / active skin disease
- pregnant or breastfeeding women

POST CARE

Redness in the treatment area may occur, and typically resolves within a few hours. Mild swelling and tenderness may develop, and typically resolve within 24 hours.

PLEASE CONTACT SKINNEY MEDSPA IF THE FOLLOWING OCCUR:

- Blister, crusting or burns
- Tenderness, redness or swelling that persists longer than 24 hours
- Nodules or lumps in the treatment area
